The Standard for Baking Powders the World Over is an Absolutely Pure, Cream of Tartar Baking Powder

REAM OF TARTAR is the crystallized acid of grapes refined to absolute purity and ground to a creamy flour. It is declared by physicians the most wholesome of all fruit acids, and has been proved by long and universal experience the most efficient and satisfactory for baking purposes.

Highly refined products of the grape, properly combined with bicarbonate of soda and a little corn starch to absorb atmospheric moisture, are the sole ingredients of the ideal, high-class, standard baking powder.

Many acids have been tried during the last hundred years to find a substitute for the grape cream of tartar which would cost less. In recent years alum, which makes a baking powder at a cost of two cents a pound, has been used because of its trifling cost. Alum, however, has been disapproved by scientific chemists and physicians and is not employed by manufacturers of high-class powders.

Cream of tartar powders being healthful themselves, add to the healthfulness of the food.

HAS PROSPEROUS YEAR Lehi, Dec. 30.—The Lehi sugar fac-tory closed its campaign for the season today when the last bag of sugar beets was sacked and placed in the storehouse. There were 25,713,700 pounds of sugar made, nearly all of which is now stored in the company's big warehouses in Lehi, but a very lit-tle of it having been shipped, owing to the demoralized condition of the sugar market.

The present was the shortest run that the Lehi factory has made in years, partly due to the shipping of 17,000 tons of Lehl beets to the Payson factory and partly due to the increased capacity of the Lehi plant. During the run 103,782 tons of beets were sliced, making an average of nearly 1500 tons of beets consumed per day during the eighty days that the factory was cutting beets.

The extraction of sugar was the lowest in years. This was the his-tory also of other Utah factories and was due to the rainy season of September when the beets should have charged by that company is exhorbibeen ripening.

POWER COMPANIES

Boise, Idaho, Dec. 20.—The electric power war that is being waged in this city has reached a climax today when the Idaho Power & Light company, formerly the Beaver River Power company, cut off the electricity it was furnishing the Idaho-Oregon Light & Power company because the latter failed to pay the former \$60,000 alleged to be due for the service since last May. RABBIT HUNTING IS

POPULAR IN BOXELDER Brigham City, Utah, Dec. 30 -Rabbit hunting is fast becoming one of the big sports of the winter for Utah sportsmen. Each winter a number of excursions are run from the larger cities of the state to the regions north of the lake in Boxelder county for bundreds of thousands. The first excursion of the winter

was run from Salt Lake on Sunday last, in which a large party of Sali Lakers participated, and were success ful in slaughtering many thousand bunnies. The second excursion passed through Brigham this morning when Ogdenites to the number of about 200, were bound for the hunt ing grounds near Rozel and Lake sta tions on the old line of the Southern Pacific in a special train equipped with a diner. This party began the hunt at a different point than those of the first excursion.

The third special will be run from this city on Friday of this week when the Brigham sportsmen will invade the stronghold of king rabbit. It is anticipated that upwards of 150 men will participate in the Brigham excur-The promoters of the Brigham party are former Senator W. C. Horsley and Peter Knudson and others.
